

8/29/2017

Like many companies we are in the process of going through many changes in our organization. The management team felt we needed to improve our skills in managing change and provide employees with some tools to manage through change.

We partnered with Employer's Resource Association to have Gary Mertz deliver change management training. The training was surprisingly affordable and was well received. Gary was able to understand our environment and address many of the issues our organization has when approaching change. This helped our employees to connect with Gary as an instructor and engage in the training. In addition I received wonderful feedback from my President and Vice President. We are now planning more training with ERA and Gary.

"Thank you very much for organizing the Change Management Training and kicking-off this process. Congratulations, this was one of the best classes I have attended."

CEO/President

"Gary was an exceptional speaker and the material was segmented very well. I would fully support future courses like this on other topics as well."

Vice President

The process of setting up and executing the training was seamless and required little coordination on my part, a big plus as I don't have a team to dedicate to training. Overall I was very happy with the process and the training delivered and would recommend ERA and Gary Mertz to any company needing to implement training with limited time and budget!

Sincerely,

Christine Schnur
